1. The User will be able to log into the app after they have been authenticated. They can either by creating an account or use their Facebook or Twitter account.

2. OPTIONAL SCREEN After it

loads, you may see a screen showing what is new or changes to the app. The user can skip this page at the bottom right. This only loads when we want it too. Not all the time. 3 When the front page doesn't load, this is the first page the user see's. The channels are listed in order of popularity. From here the user can go directly into the player to listen to the music or watch the video channels.

4.1 Clicking on the info button or the artist photo will take you to the song info page.
